FOLLOW-UP/MAINTENANCE VISITS:
See your dentist at the following intervals after receiving your appliance:

**Week 1:** “Comfort Check.” Make any necessary adjustments for the fit and positioning.

**Months 1, 2, and 3:** Evaluate your teeth and the appliance to make any necessary adjustments in jaw position.

ELASTIC PLACEMENT:
Place the elastic on the hook in the upper cuspid area of the appliance down around the lower retention screw as shown in this photo. Your dentist will demonstrate this procedure as needed.

ADJUSTMENTS MADE BY DENTISTS OR PATIENT

Turning the hex driver clockwise to advance the mandible in .25mm increments.

Turning hex driver counterclockwise decreases advancement in same increments.

½ mm advancement – Turn the Hex Driver clockwise 180° i.e. one-half turn
½ mm advancement – Turn the Hex Driver clockwise 360° i.e. one full turn
1 mm advancement – Turn the Hex Driver clockwise 720° i.e. two full turns

PLEASE NOTE:
1. All Oasys Herbst Hinges are preset with 2mm pre-activation permitting up to 2mm retraction, if necessary.
2. 3/16” vertical elastics are included if required. These elastics help keep the upper and lower arch together causing a “lip seal”. Place the elastic on hook in the upper cuspid area of appliance down around the lower retention screw.
3. Use the Hex Driver to periodically assure that the screws attaching the Hinges to the appliance are tight.

PATIENT INSTRUCTIONS:

**ADJUSTABLE HERBST APPLIANCE - OASYS HINGE ACRYLIC**

The Adjustable Herbst Appliance-OASYS Hinge-Acrylic Appliance is one of the most widely used choices for treating snoring and obstructive sleep apnea. Its two-piece construction allows for comfort and lateral jaw movement, while adjustable tubes on both sides of the upper portion are used to gradually move the lower jaw forward. Each appliance is custom-made by prescription only.

The Appliance reduces nighttime snoring and mild-to-moderate obstructive sleep apnea. It is worn while you sleep in order to support your lower jaw in a forward position prescribed by the dentist. In the event that you tend to sleep with your mouth open, the dentist may recommend that you use a vertical elastics as shown on page 5, in order to keep your upper and lower arches together.

FABRICATED BY:
SML® - Space Maintainers Laboratories

RISKS
This device should not be used if you:
• Have Central Sleep Apnea (CSA)
• Have severe respiratory disorders
• Have loose teeth or advanced periodontal disease
• Are under 18 years of age
• Have few or no teeth to retain the appliance
• Have inadequate range of motion of your lower jaw
• Have myofacial dysfunction (facial pain)
• Have anthropathy of the TMJ (arthritis of the main jaw joint)
• Are undergoing orthodontic treatment
• Are undergoing dental work that requires temporary crowns

WARNINGS
Use of the appliance may cause:
• Gum irritation or dental soreness
• Pain or soreness of the jaw joint (TMJ) or facial muscles
• Increased salivation
• Loosening and/or dislodging of dental fillings or crowns.

NOTE: A small percentage of patients actually increase their number of apneic and hypopneic events when using an oral appliance. Should any of these problems occur, discontinue use of the appliance and call your dentist.

PRECAUTIONS:
Performance may be adversely affected by: weight gain, obesity, alcohol consumption, sedative use, allergies, smoking, very high altitudes, increased age, hormonal changes such as menopause, a cold, or sickness that compromises nasal breathing.

INSTRUCTIONS
Use this appliance daily during sleep. Prior to inserting the appliance, brush and floss your teeth

INSERTION:
1. Place upper part in your mouth and gently press it upward onto your teeth with your thumbs.
2. Place the lower part of the appliance against the upper part and bring your jaw forward so that you can carefully insert your teeth into the appliance.
3. Complete placement by pressing the lower part down with your forefingers to seat the appliance over your lower teeth.

REMOVAL:
1. Remove the lower part of your appliance first, using your thumbs on both sides to carefully lift it off your teeth.
2. Remove the upper part of the appliance by carefully pulling down on the sides of the appliance.
3. Rinse and clean your appliance.

AFTER NIGHTTIME USE, (and removal of the appliance), you may feel that your teeth do not bite together as before. If this feeling persists for more than twenty minutes after removal, use the SML® Good Morning Positioner as described below.
• Place it between upper and lower teeth.
• Bite down slowly.
• Hold your mouth closed for several seconds.
• Repeat opening and closing until your bite feels normal.
• Insert daytime-wear appliance.

CARE AND CLEANING:
• Be sure to keep your appliance trays clean. Examine them often for signs of wear and tear. If you suspect that damage has occurred, DO NOT wear your appliance until you contact your dentist and have your appliance inspected.
• After each use, rinse your appliance in cold or lukewarm water.
• Gently brush all surfaces with a mild soap and soft toothbrush.
• DO NOT USE TOOTHPASTE. It will abrade the appliance.

With proper care, this appliance will last years, barring any significant changes in your teeth. Inspect your appliance regularly. If you notice any chipping or cracking in the appliance, or the clasps are bent (or it seems to fit differently) see your dentist as soon as possible to repair or replace the appliance. These changes could effect its proper functioning and or safety. Consult your dentist with questions on continuing use of this appliance.

STORING:
Always dry the appliance completely before storing. Place it in a dry plastic case whenever it is not in your mouth. Keep your appliance so that family pets cannot reach it.

WARRANTY:
This appliance is custom made for ensured comfort and durability. It is warranted by the certified laboratory employed by your dentist. This is a manufacturer’s warranty and is not a claim for eliminating snoring or improving your obstructive sleep apnea. If your appliance is broken or damaged, discontinue use and contact your dentist to have it repaired -- before you re-use the appliance.
FOLLOW-UP/MAINTENANCE VISITS:
